

Tell Us Your Vision

You have a vision of how you would like to enhance your appearance. When you come to Zel for a consultation, we'll discuss that vision with you—and your best options for achieving the results you want.

To help us understand your vision more clearly, you might find it helpful to consider the following questions. Jot down your answers and bring them with you to your consultation.

What do you hope to accomplish by receiving skin and laser care? What are your expectations?

How will you measure the success of the services you receive from us – in other words, what will need to happen for you to consider a particular service or procedure successful?

What is the most important concern you have that we need to know about? What question do you need answered the most.

We look forward to meeting you at your consultation.
